INDEX OF SUBJECTS AND AUTHORS

Agglutination of the Flexner dysentery bacillus by the blood serum of tuberculous persons, The, 272

Alterations in endothelial permeability and their relation to the tuberculous focus, 122

Altitude, humidity and density of population, Tuberculosis mortality in relation to, 112

Antigenic properties of the lipoids of the tubercle bacillus, A study of the, 73

Antigens, serum, Specific, in tuberculosis, 359

Arneth counts and coagulation time, Blood morphology, in normal and untreated tuberculous guinea pigs. Hematological studies on experimental tuberculosis in the guinea pig, I. Studies on the biochemistry and chemotherapy of tuberculosis, XXVII, 138

Artificial circulatory constriction, The effect of, on local tuberculosis in the rabbit, 554

—— pneumothorax in pulmonary tuberculosis. A study of 109 cases, 449

—— ——, Mediastinal shifting in, 464

—— —— treatment, Some results of, 438

Ascitic tuberculous peritonitis, treatment of, Intraperitoneal oxygen inflations in the, 473

Aspiration, The pulmonary aspiration of particulate matter and pulmonary tuberculosis produced experimentally by, 386

Associated diseases in pulmonary tuberculosis, 40

Auscultatory signs in the diagnosis of pulmonary tuberculosis, The question of the most reliable, 278

Auto-serum test for tuberculosis, The, 341

Auto-urine reaction, Wildbolz, in tuberculosis, The, 366

Bacilli, fusiform, and spirochetes, Studies on. VI. Their association with pulmonary tuberculosis in cavities, bronchiectasis and gangrene, 249

——, tubercle, in human bile, The presence of virulent, 260

——, ——, —— the excretions of tuberculous patients, The demonstration of increased numbers of, 85

——, ——, The isolation and cultivation of, protected from light, 165

——, ——, —— solvent action of oleic acid on cultures of, 393

Bacillus, Flexner dysentery, The agglutination of the, by the blood serum of tuberculous persons, 272

——, tubercle, antigenic properties of the lipoids of the, A study of the, 73

——, ——, Chemical evidence on the phylogenetic classification of the, 195

——, ——, The effect of carbon on, in vitro, and on experimental tuberculosis in the rabbit, 530

Bactericidal value of organic mercurial compounds in experimental tuberculosis in guinea pigs, The therapeutic and. Studies on the biochemistry and chemotherapy of tuberculosis, XXVIII, 234

Balderrey, Frank C., and Ewald, Emily. Light energy in therapeutics, 501

Bender, Lauretta, and DeWitt, Lydia M. Hematological studies on experimental tuberculosis of the guinea pig. I. Blood morphology, Arneth counts and coagulation time in normal and untreated tubercuous guinea pigs. Studies on the biochemistry and chemotherapy of tuberculosis, XXVII, 138

Biggs, Hermann M. Obituary, 1

Bile, human, The presence of virulent tubercle bacilli in, 260

Biochemistry and chemotherapy of tuberculosis, Studies on the, XXVII. Hematological studies on experimental tuberculosis of the guinea pig, I. Blood morphology, Arneth counts and coagulation time in normal and untreated tuberculous guinea pigs, 138

——— ——— ——— ——— ———, ——— ——— ———. XXVIII. The therapeutic and bactericidal value of organic mercurial compounds in experimental tuberculosis in guinea pigs, 234

——— ——— ——— ——— ———, ——— ——— ———. XXIX. The influence of silica compounds on experimental tuberculosis, 318

——— ——— ——— ——— ———, ——— ——— ———. XXX. The influence of silica on the strength of newly formed connective tissue, 337

BLACK, LOUISA T. The technique of chest roentgenography in pulmonary tuberculosis, 371

Blood in tuberculosis, The chemistry of the, 405

—— morphology, Arneth counts and coagulation time in normal and untreated tuberculous guinea pigs. Hematological studies on experimental tuberculosis of the guinea pig, I. Studies on the biochemistry and chemotherapy of tuberculosis, XXVII, 138

—— serum of tuberculous persons, The agglutination of the Flexner dysentery bacillus by the, 272

BROMAN, JESSE ROBERTS. The influence of silica on the strength of newly formed connective tissue. Studies on the biochemistry and chemotherapy of tuberculosis, 337

BRONFIN, I. D., AND MARKEL, C. Chaulmoogra oil in the treament of laryngeal tuberculosis, 214

BROWN, LAWRASON, AND HEISE, FRED H. A case of hydropneumopericardium in a tuberculous individual during an attack of typhoid fever, 284

BROWN, PHILIP KING. Surgical aids in therapy of tuberculosis, 484

——, ———, AND ELOESSER, LEO. Surgical intervention in pulmonary tuberculosis: pathological conditions in the lung and the various forms of operation applicable to them, 519

BURNETT, CLOUGH TURRILL. Mediastinal shifting in artificial pneumothorax, 464

Carbon, The effect of, on the tubercle bacillus in vitro and on experimental tuberculosis in the rabbit, 530

Case of hydropneumopericardium in a tuberculous individual in an attack of typhoid fever, A, 284

Chaulmoogra oil in the treatment of laryngeal tuberculosis. Observations on its local and constitutional effects, 214

Chemical evidence on the phylogenetic classification of the tubercle bacillus. The plant or animal question, 195

Chemistry of the blood in tuberculosis, The, 405

Chemotherapy of tuberculosis, Studies on the biochemistry and, XXVII. Hematological studies on experimental tuberculosis of the guinea pig, I. Blood morphology, Arneth counts and coagulation time in normal and untreated tuberculous guinea pigs, 138

——— ——— ———, ——— ——— ——— ——— ———, XXVIII. The therapeutic and bactericidal value of organic mercurial compounds in experimental tuberculosis in guinea pigs, 234

——— ——— ———, ——— ——— ——— ——— ———, XXIX. The influence of silica compounds on experimental tuberculosis, 318

——— ——— ———, ——— ——— ——— ——— ———, XXX. The influence of silica on the strength of newly formed connective tissue, 337

Chest findings, normal, Teaching, to medical students, 184

—— movement, limitation of, chest thickness and muscle spasm in the diagnosis of pulmonary tuberculosis and their relation to pleurisy, A study of the, 59

—— roentgenography in pulmonary tuberculosis, The technique of, 371

Circulatory constriction, The effect of artificial, on local tuberculosis in the rabbit, 554

Classification, phylogentic, of the tubercle bacillus, Chemical evidence on the, 195

Coagulation time, Blood morphology, Arneth counts and, in normal and untreated tuberculous guinea pigs. Hematological studies on experimental tuberculosis of the guinea pig. I. Studies on the biochemistry and chemotherapy of tuberculosis, XXVII, 138

Connective tissue, The influence of silica on the strength of newly formed. Studies on the biochemistry and chemotherapy of tuberculosis, XXX, 337.

Constipation in tuberculosis, 575

Constriction, The effect of artificial circulatory, on local tuberculosis in the rabbit, 554

Corper, H. J. The pulmonary aspiration of particulate matter and pulmonary tuberculosis produced experimentally by aspiration, 386

——, ——. ——., and Goldberg, Max. The effect of artificial circulatory constriction on local tuberculosis in the rabbit, 554

——, ——. ——., Simmons, James S., and, Freed, Harold. The presence of virulent tubercle bacilli in human bile, 260

——, ——. ——., Starry, A. C., and Lurie, Max B. The effect of carbon on the tubercle bacillus in vitro and on experimental tuberculosis in the rabbit, 530

Cultivation of tubercle bacilli protected from light, The isolation and, 165

Cultures of tubercle bacilli, The solvent action of oleic acid on, 393

Davis, D. J., Shapiro, I. J., and Pilot, I. Studies on fusiform bacilli and spirochetes. VI. Their association with pulmonary tuberculosis in cavities, bronchiectasis and gangrene, 249

Demonstration of increased numbers of tubercle bacilli in the excretions of tuberculous patients, The, 85

Density of population, Tuberculosis mortality in relation to altitude, humidity and, 112

De Witt, Lydia M. The therapeutic and bactericidal value of organic mercurial compounds in experimental tuberculosis in guinea pigs. Studies on the biochemistry and chemotherapy of tuberculosis, XXVIII, 234

——, —— ——., and Bender, Lauretta. Hematological studies on experimental tuberculosis of the guinea pig. I. Blood morphology, Arneth counts and coagulation time in normal and untreated tuberculous guinea pigs. Studies on the biochemistry and chemotherapy of tuberculosis, XXVII, 138

Diagnosis of pulmonary tuberculosis, A study of the limitation of chest movement, chest thickness and muscle spasm in the, and their relation to pleurisy, 59

—— —— —— ——, The question of the most reliable auscultatory signs in the, 278

Dienes, L., and Schoenheit, E. W. A study of the antigenic properties of the lipoids of the tubercle bacillus, 73

Drolet, Godias J. Tuberculosis in England and Wales. A statistical analysis and review, 396

Dysentery bacillus, Flexner, The agglutination of the, by the blood serum of tuberculous persons, 272

Effect of artificial circulatory constriction on local tuberculosis in the rabbit, The, 554

—— —— carbon on the tubercle bacillus in vitro and on experimental tuberculosis in the rabbit, The, 530

—— —— injections of foreign protein on experimental tuberculosis in guinea pigs, The, 570

Eloesser, Leo, and Brown, Philip King. Surgical intervention in pulmonary tuberculosis: pathological conditions in the lung and the various forms of operation applicable to them, 519

Endothelial permeability, Alterations in, and their relation to the tuberculous focus, 122

Energy, Light, in therapeutics, 501

England and Wales, Tuberculosis in, 396

EWALD, EMILY, AND BALDERREY, FRANK C. Light energy in therapeutics, 501

Excretions of tuberculous patients, The demonstration of increased numbers of tubercle bacilli in the, 85

Experimental observations on intratracheal and intranasal injections in rabbits, 66

—— tuberculosis in guinea pigs, The effect of injections of foreign protein on, 570

—— —— —— —— ——, The therapeutic and bactericidal value of organic mercurial compounds in. Studies on the biochemistry and chemotherapy of tuberculosis, XXVIII, 234

—— —— —— the rabbit, The effect of carbon on the tubercle bacillus in vitro and on, 530

—— —— of the guinea pig, Hematological studies on. I. Blood morphology, Arneth counts and coagulation time in normal and untreated tuberculous guinea pigs. Studies on the biochemistry and chemotherapy of tuberculosis. XXVII, 138

—— ——, The influence of silica compounds on. Studies on the biochemistry and chemotherapy of tuberculosis, XXIX, 318

FARRELL, JOHN T., JR., AND FLECK, ROLAND F. Artificial pneumothorax in pulmonary tuberculosis. A study of 109 cases, 449

Fat, The iodine value of the, contained in livers from tuberculous subjects, 245
